2007 — Windsor Girls School — 2012 — University of Sussex — 2015

A-levels: Mathematics (A), Product Design (A), Physics (B)
GCSE: Mathematics (A), Physics (A), Biology (A), Chemistry (A), Graphic Design (A), Art (A), English (B), French (B)

BSc. (Hons) Computer Science 2:1
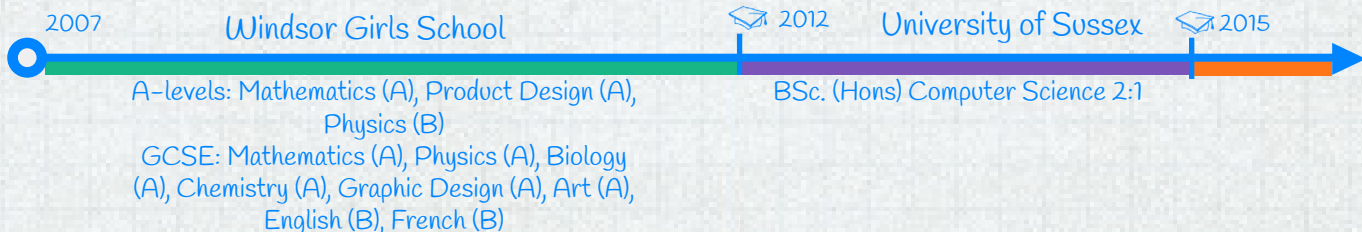

Experience

Freelance Designer and Front-end developer
June 2015

I was contracted for design work. The work module included: design of several, product & service logos, product brochure designs, company website design & build.

Sales Advisor (computing department), Currys PC World
2014–2015

Worked as a Sales Advisor in the computing department of the Farnborough Currys PC World store. My job included providing customer advice on product and product suitability. Carrying out sales and signing up customers for support contracts.
There were many sales targets I was required to meet on a daily bases. Where the targets included selling the companies services and goods along side the core products being sold. Having successfully met all sales targets, my work was appreciated by the Manager.

Internship, Lollaksi Ltd.
Summer 2013

My position was a paid summer internship where working with the team of developers and graphic designers, I contributed towards the new cloud based synchronization app the company was developing.
For understanding user requirements, I actively participated on a team for the brain storming sessions and my ideas and thoughts were put into the website for the application that was being created. Using my own initiative, I independently created a 3D animation, which the company used as a form of advertisement for their product.

Seasonal worker, LEGOLAND Windsor
2011

I was a seasonal worker in the attractions department; my job included me interacting with kids in a friendly and energetic manner and the same time ensure they had a safe and enjoyable ride.
Ensuring customer safety was prime, confirming to all safety checks before a ride could commence, which included height clearance, checking safety belts and getting people of the ride were the focus points of my job.
